Flexible Track Technical Datasheet

Description

When constructing curved walls, stud centers should be reduced to suit the respective lining board. The Flexible Tracks at the top and bottom are curved to match the specified radius and fastened to the structure through the holes provided in the web.

Primary Data

Drywall Product	Flexible Track
Drywall System	Applicable for Partition & Liner Systems
Coating	Z275 Zinc Coating
Steel Grade	G2 Min. Yield Strength: 270 Mpa Min. Tensile Strength: 330 Mpa
Material	Galvanized Steel

Technical Data

Part No.	Type	Width (mm)	Length (mm)
PN103, PN104, PN105, PN106	Flexible Track	51, 64, 76, 92	3000
PN107, PN108, PN109, PN110	Deflection Head Flexible Track	64, 76, 92, 150	3000
