SHIELD^{me}TM

SANITIZING TUNNEL

info@shieldmeglobal.com
www.shieldmeglobal.com

INTRODUCTION

SHIELD_{me}™ SANITIZATION TUNNEL is designed to counter the serious world health emergency situation and create a solution that can be of public value. The disinfection tunnel is a passageway with an integrated hydraulic system for the fogging of the disinfectant liquid to kill Viruses, Bacteria, Mold, Fungi and Spores.

SHIELD_{me}™ is an ISO 9001: 2015 Quality management system certified company.

OPERATION

SHIELD_{me}™ SANITIZATION TUNNEL uses a pump to distribute shield me liquid to spray nozzles which are equally distributed on a hose line inside the tunnel. The fogging system is connected to a control panel capable of automatically detecting and spraying disinfectant sanitizing liquid for pre-set time. The nozzles spray & close automatically using motion sensors (For tunnels without doors), or via limit switch (For tunnels with doors). Under the tunnel, a collection tray is provided to collect the disinfectant liquid that is accumulated during the process.

The design allows disinfecting all surfaces even if not directly exposed to the nozzle.

APPLICATIONS

PUBLIC TRANSPORT

HOTELS

MALLS

LEISURE

RESTAURANTS

BANKS

HOSPITALS

EDUCATIONAL

WORSHIP AREAS

SHIELD_{me}™ SANITIZING SOLUTIONS

MAIN CATEGORIES

TUNNEL WITH DOOR
MODEL: DT-MF-100-WD

TUNNEL WITHOUT DOOR
MODEL: DT-MF-100-W

SHIELDme™ disinfection tunnels are designed to achieve the following:

- ✓ Easy transportation
- ✓ Light weight
- ✓ Easy Installation
- ✓ Adjustable for pre-set time
- ✓ Custom designs are available.

Construction material can be one of the following:

- a Tunnel with rigid sheet metal construction
- b Tunnel with steel tube and sheet metal construction

PRODUCT RANGE

Tunnel applicable only with **SHIELD_{me}**™

**DISINFECTION SANITIZING TUNNEL
FOR SINGLE ENTRY**

MODEL: DT-MF-100-G

**DISINFECTION SANITIZING TUNNEL
FOR SINGLE PERSON ENTRY
WITH ARCH DESIGN**

MODEL: DT-FD-100

Color Options:
Blue Green White Red Yellow Orange

**DISINFECTION SANITIZING TUNNEL
FOR 3 PERSON ENTRY**

MODEL: DT-MF-300-G

**DISINFECTION SANITIZING LONG
TUNNEL FOR COMMERCIAL
VEHICLES & TRUCKS**

MODEL: DT-FD-V-100

**We reserve the right to change specifications of our product without prior notice.*

We provide fully assembled and ready to use **SHIELD_{me}TM** Sanitization tunnel, our tunnels consist of the below items:

- 1 Spray nozzles with tube and fittings
- 2 Diaphragm pump
- 3 Control panel (Weather proof)
- 4 Motion sensor or limit switch
- 5 SHIELD me Disinfectant liquid
- 6 Hygiene anti slip floor mat

DISINFECTING PROCEDURE

- a Enter the tunnel.
- b Sensor activates.
- c Fogging through nozzles.
- d Fogging stops.
- e Exit the tunnel.

SHIELDme™ LIQUID MATERIAL SAFETY DATA SHEET

SAFE FOR HUMANS

ECO-FRIENDLY

NON-ALCOHOLIC

100% NATURAL

**KILLS 99.9% OF
VIRUSES / BACTERIA**

ADVANTAGES

- ✓ Maximum hygiene.
- ✓ Preventing epidemic diseases.
- ✓ Economical.
- ✓ 100% natural, 100% safe, zero chemicals, nontoxic.
- ✓ Advanced and quality assured.
- ✓ Eco-friendly.
- ✓ Fully-automated, alarming once the tank is empty.
- ✓ Tested.
