

ROYAL FLEX

Air-Flow Spring System™

Patented Hybrid Pocket Spring Technology. Combination of 3 different height pocketed coils provide best air circulation and support each part of body. Pocketed coils work differently depending on body weight and body areas such as hip-shoulder and back.

Air-Flow Spring System

1000 Coils per m²

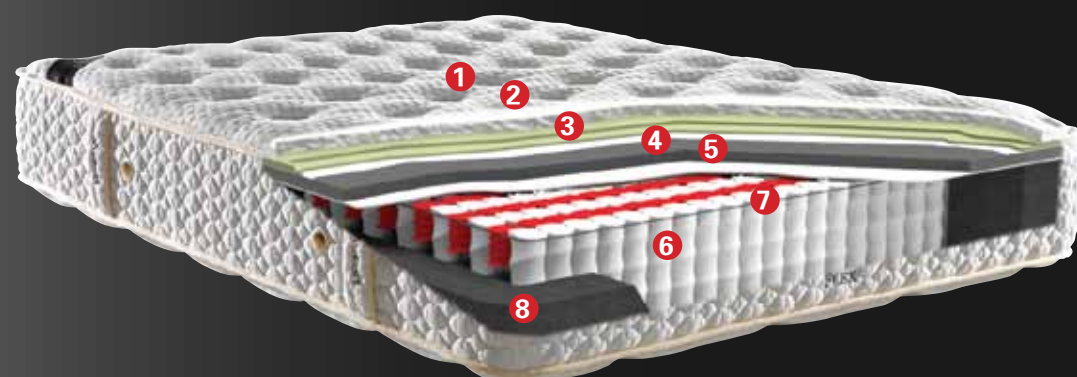

1000 individual pocket springs respond as you move, reducing pressure points and gently support.

Open-Cell Foam®

Compared to classic PU foam, Open-Cell foam technology contains much bigger holes in its structure, supply maximum air-circulation and great support.

Mattress height: 32 cm

Firmness Level

1. 500 gr/m² double jersey fabric
2. Polyester padding
3. Soft-touch foam
4. Open-Cell foam layer
5. Isolation layer
6. Air-Flow Spring System
7. Metal frame
