Sprinkler Connection Hose

Sprinkler hose system is including sprinkler connection hose, sprinkler hose assembly kit and this hose system are used to install between sprinklers and fire lines. When the fire starts, the sprinkler system gets in action automatically to spray the water to the flame and blow out or control the fire in desired area. Sprinkler connection hose has flexible structures due to this it is not being affected by seismic motions.

Hose Material: AISI 316L Stainless steel
Braid Material: AISI 304 Stainless steel
Fittings Material: Carbon steel– Stainless steel
Fire Line Connection: Nipple
Sprink Connection: Threaded special parts for sprinklers
Fixing parts: Carbon Steel
Hose diameter: DN20 (3/4") – DN25 (1")
Working Pressure: Up to 16 Bars
Bending Radius: Min. 200mm

Application Area:

–All kind of buildings

- Shopping Mall
- Hotels
- Hospitals
- Public Area
