Titanium Coating

The use of Titanium Coating in Glass gives reflection properties to the Glass, and at the same time, let us print a huge number of different designs and patterns with higher reflection.

Titanium Coating Glass is well-known for it's applications such us:

- Doors decoration
- Windows decoration
- Shower Doors by giving enhance privacy at the same time.
- Furniture Decoration
- Interior Decoration

Mainly distributed to Hotels, Casinos, KTV, Clubs and projects for home appliances.

The process of manufacturing can be divided on two, and also be customized, giving the posibility of firstly apply an Acid Etched layer on the glass, enhancing the privacy properties on this Glass, then using different patterns apply the Titanium Coating on the glass, having the final product. Other way is applying special treatment, so the Titanium Coating can be also tempered after we deliver it to our customers, in this way our customers can give beatiful designs for decoration and at the same time the best properties of Tempered Toughned Glass improving their wide range of use.
