

# Laminated Glass

Laminated Glass is a high, durable, high-performance glazing product, designed to improve safety by keeping the glass together in case of breakage.

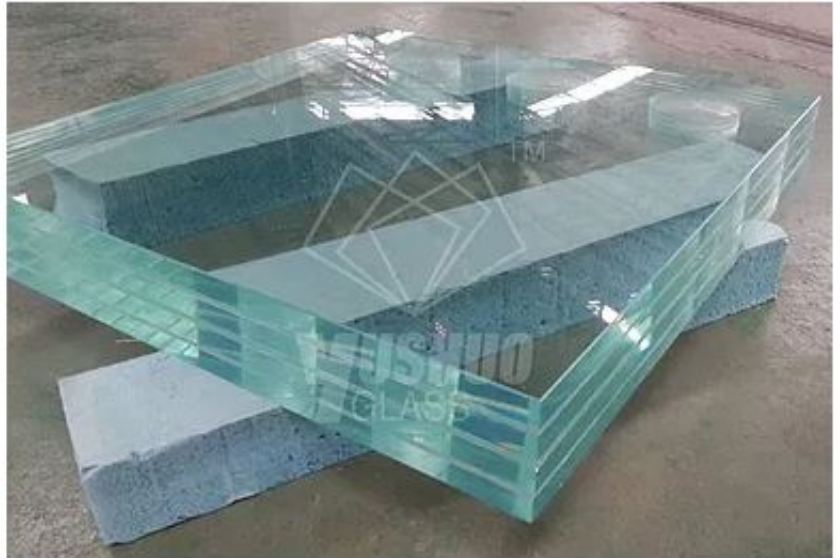

It is more often used as safety glass to provide protection against natural disaster or other threats such as bomb blasts, forcible entry, hurricanes, etc.

A wide range of combinations is available for laminated glass, giving the possibility to fit all customers and engineers requirements, such as:

- Using Low-e glass on Laminated glass for improving energy efficiency on curtain walls.
- Tinted Glass on Laminated glass to give more aesthetics to glass appliances such as fences, curtain walls, sliding doors, etc.
- Decorative Glass to improve the safety in products which are not suitable for tempering.
- Tempered Glass to make glass stronger and more resistance to accidents.
- Insulated Glass, to improve the building energy efficiency.

In most of the cases, the use of laminated glass is justified by the improvement in quality and safety of the final product and appliance.

Yushuo Glass supplies Laminated Glass with clear and colored PVB, EVA Film or SGP, according to the customer requirements.

# Specifications

## Laminated Glass

- Thickness: 5.38mm/ 38mm/ 8.38mm/ 10.38mm/ 12.38mm/ 20.38mm/ 6.76mm/ 8.76mm/ 10.76mm/ 12.76mm/ 16.76mm/ 20.76mm/ 30.76mm.
- Interlayer: PVB 0.38mm/ PVB 0.76mm/ EVA 0.38mm/ EVA 0.76mm/ SGP 0.89mm/ SGP 1.52mm/ SGP 2.28mm.
- Max. Size: 3660x2440mm.
- Other Sizes: 1830x2440mm/ 2134x1524mm/ 2000x1524mm/ 2000x1500mm/ 2200x1650mm/ 3050x2134mm/ 3050x2440mm/ 3210x2050mm/ 3210x2250mm/ 3300x2134mm/ 3300x2250mm/ 3300x2440mm.
- Glass Colours: Clear, Extra Clear, French Green, Dark Green, Ford Blue, Dark Blue, Bronze, Euro Grey etc.
- PVB Colours: Clear, Green, Blue, Bronze, Grey, Milky White, etc.
- Available with Designs
- Processing: Edging, Polishing, Beveling, Tempering, Insulating can be combined with different kinds of decorative glass.
